

## GLOBAL Ecotherm PROFESSIONAL

### Single sided preheating oven

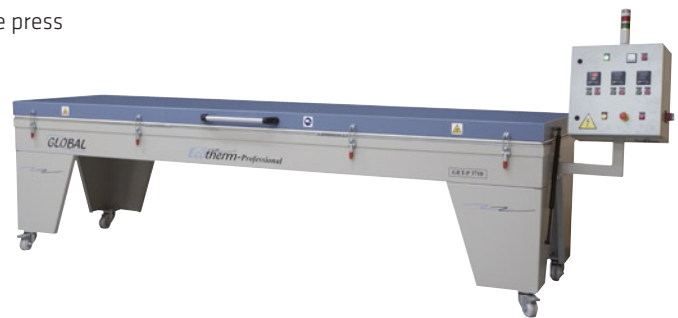

The GET-P is a high quality single sided preheating oven with bottom aluminum heating platen, programmable auto-tuning temperature control and cover for energy saving as well as to ensure homogeneous temperature distribution. The oven fits perfectly in a production workflow with one GLOBAL vacuum press, meaning the ratio of preheating time to moulding time. The oven can be used for preheating solid surface material, thermoplastics, methacrylates, postformable compact boards and similar materials.

#### PRODUCT INFORMATION

- Fits perfectly in a production workflow with one GLOBAL vacuum press
- Usable for preheating solid surface material, thermoplastics and postformable compact boards and similar materials
- Working height (1 m) allows easy material transferring to the press
- Available with 1 or 3 individual heating zones
- Single sided heating platen
- Manual opening and closing
- Preheating time 2 min/mm material thickness

#### TECHNICAL DETAILS

- Working temperature  $\pm 130$  to  $170$  °C, max.  $200$  °C
- Adjustable digital temperature control
- Overheating protection
- Max. 30 mm material thickness
- Average energy use 1 to 3 kW/h
- 380 Volt, three-phase

Code	Heating Surface	1 Heating Zone	3 Heating Zones
